

JOSHUA LEE

020-4069-1227 | me@joshualee.co.nz | joshualee.co.nz | github.com/JoshoeaLee | linkedin.com/in/joshua-lee97

Previously interpreted client visions into English. Currently interpreting visions into code.

EDUCATION

Victoria University (Wellington, New Zealand)

2022-2023: Masters of Software Development

Hitotsubashi University (Tokyo, Japan)

2018-2022: Bachelors in Social Sciences majoring in Translation

Tokyo University of Foreign Studies (Tokyo, Japan)

2017-2018: One Year Japanese University Preparation Course

Yonsei University (Seoul, South Korea)

2016-2017: Intensive Korean Language Course (NZ Prime Minister's Scholarship for Asia and Latin America)

Paraparaumu College (Kāpiti, New Zealand)

2011-2015: 2015 Dux and Head Boy. NCEA Scholarships in Calculus, Statistics, Physics, Chemistry, Japanese and Drama

EXPERIENCE

Intern Analyst Developer - FNZ April - July 2023

(C#, .NET, VB, Selenium, TeamCity, Jira, AzureDevOps, SQL, Burp)

Worked in a team of developers to automate suites of manual tests for a variety of financial platforms. Frequently collaborated and communicated with non-developers (testing/operations teams) to achieve goals together.

Japanese to English Translator — Genius Inc. 2020 - 2022

Translated and localised documents and video games from Japanese to English.

Regularly kept in contact with an end client to make sure all requirements were met and to adapt to any requirement changes. Performed in a heavily time-restricted and high pressure environment.

English Language Tutor — Kanda University of International Studies 2021 - 2022 (Part-Time)

Communicated with other staff to coordinate instruction to suit students' individual requirements.

Worked interpersonally in a positive manner with a variety of students with differing temperaments and needs.

Teaching Assistant — Hitotsubashi University 2019 - 2020 (Part-Time)

Developed organisational and time-management skills leading students in having them set up local sports festivals.

Required speaking in Japanese, Korean and English to people from diverse linguistic and cultural backgrounds.

PROJECTS

Personal Website — React.js, ASP.NET Core, Microsoft SQL Server, Azure Web Services

A full stack web app with React.js being used for the front end and ASP.NET Core being used to make the back end API. Data is stored in a Microsoft SQL server and Azure services are used for deployment of SQL server and website.

Tagalog TwitterBot — Node.js, MongoDB, Express.js, AWS Lambda, 3rd Party API

A program in Node.js which retrieves data from a MongoDB database which was populated using an API made with Express.js. AWS Lambda and the Twitter API are then used to tweet new vocabulary from this database to me everyday.

'JoshBook' - Server/Client Messaging Application — Java, RSA/AES Encryption, Azure SQL, Azure VM

A live messaging app which has a server side and client sides with messages being stored in an intermediary Azure SQL database. Individual session keys (AES) are created for clients on login, these are then encrypted, sent and decrypted using asymmetrical encryption methods (Public/Private Keys).

VOLUNTEERING

-2020 Tokyo Olympics (Interpreter)

-Tokyo Cultural Resources Alliance (Sports Festival Coordinator)

TECHNICAL SKILLS

-Extensively Used in Paid Work

- ❖ C#, VB, Bash
- ❖ ASP.NET Core, Selenium, SQL
- ❖ Azure Cloud Services, Azure Devops, Git, TeamCity, Jira

- Used for personal and academic projects

- ❖ JavaScript, TypeScript, Java, PHP, Python, HTML/CSS
- ❖ React.js, Node.js, MongoDB, React-Native
- ❖ GitHub, GitLab, Figma, AWS

CERTIFICATIONS

- AWS Cloud Practitioner

WORK STATUS

- NZ Citizen
